GZA GeoEnvironmental, Inc.

NORWOOD MA AND WALLED LAKE MI...ISSUED NOVEMBER 17, 2008...GZA GeoEnvironmental Inc., a leading environmental and geotechnical consulting firm, has announced that Vision Environmental, Inc (VEI) of Walled Lake MI has joined the company and significantly expanded GZA's capabilities.

Vision Environmental, Inc. will add air quality, permitting, regulatory compliance and below-ground environmental assessment capabilities to GZA's Great Lakes operations. The move nearly doubles GZA's growing air quality practice and expands their services to the automotive and other industries in the Midwest. VEI is a 16-year old firm located in Southeastern Michigan. The entire former staff of VEI will join the staff at GZA and the founder of VEI, Tony Percha, will become Vice President in GZA and will work from the Livonia, MI office. GZA anticipates that the entire VEI operation will join the Livonia MI office in moving to a new location early next year.

With the emergence of climate change, the increasing concern over the impacts of greenhouse gas emissions and the awareness of environmental sustainability, this expansion of GZA's air quality practice supports the company's strategic decision to enhance air quality, regulatory compliance and permitting capabilities.

"Both firms have operated under the belief that success is based on quality individuals providing responsive service and creating the reputation for being the best in the business," said William R. Beloff, President and CEO of GZA GeoEnvironmental, Inc. " Vision Environmental has built a strong reputation for excellence in their areas of expertise and we look forward to combining our resources and strong knowledge base to ensure our continued commitment to the highest level of service for all of our existing and new clients."
