

John A. Schneider, P.E. Named Vice President for GZA GeoEnvironmental, Inc.

NORWOOD MA AND WALLED LAKE MI...ISSUED JANUARY 20, 2009...GZA GeoEnvironmental Inc., a leading environmental and geotechnical consulting firm, has announced that John A. Schneider, P.E. has been named to the position of Vice President.

Schneider joined GZA this past year as part of Vision Environmental, Inc (VEI) of Walled Lake MI. Schneider earned a Bachelor of Science degree in Pulp and Paper Science from Michigan Technological University and a Master of Science in Chemical Engineering from Wayne State University.

His area of expertise is air quality management. He brings over twenty two years of experience in the environmental profession; eighteen years in air quality management and environmental compliance, including twelve years as a manager of air quality services. Schneider is a Licensed Professional Engineer in Michigan and a member of the Air & Waste Management Association.

Vision Environmental, Inc. added air quality, permitting, regulatory compliance and below-ground environmental assessment capabilities to GZA's Great Lakes operations. This nearly doubled GZA's growing air quality practice and expanded their services to the automotive and other industries in the Midwest.

With the emergence of climate change, the increasing concern over the impacts of greenhouse gas emissions and the awareness of environmental sustainability, this expansion of GZA's air quality practice supports the company's strategic decision to enhance air quality, regulatory compliance and permitting capabilities.

"We are pleased to announce that John has taken on this important leadership role for GZA. said William R. Beloff, President and CEO of GZA GeoEnvironmental, Inc. " Air quality is an important and growing sector of our industry and John is a great resource for all of our clients."
