

Anthony F. Percha, Founder of VEI, Named Vice President for GZA GeoEnvironmental, Inc.

NORWOOD MA AND WALLED LAKE MI...ISSUED MARCH 6, 2009...GZA GeoEnvironmental Inc., a leading environmental and geotechnical consulting firm, has announced that Anthony F. Percha has been named to the position of Vice President.

Percha joined GZA this past year as part of Vision Environmental, Inc (VEI) of Walled Lake MI. He was founder of VEI and served as principal for the last fifteen years. He earned a Bachelor of Science degree in Environmental Engineering from Michigan Technological University.

Percha has over twenty three years of experience as an environmental professional with a primary focus on air quality management. His experience includes five years as a manager of the local air resources division of a large national consulting firm with significant experience with management of air quality issues in automotive manufacturing and related industries. His experience includes the technical oversight of all air quality related projects, asbestos project management, lead based paint project management, and support on various environmental site assessments, Toxic Release Inventory Reporting and compliance audits. Percha is a member of the Air and Waste Management Association.

Vision Environmental, Inc. added air quality, permitting, regulatory compliance and below-ground environmental assessment capabilities to GZA's Great Lakes operations. This nearly doubled GZA's growing air quality practice and expanded their services to the automotive and other industries in the Midwest.

With the emergence of climate change, the increasing concern over the impacts of greenhouse gas emissions and the awareness of environmental sustainability, this expansion of GZA's air quality practice supports the company's strategic decision to enhance air quality, regulatory compliance and permitting capabilities.

"Tony is a known leader within the air quality industry and we are pleased to have him join our growing team in this important role," said William R. Beloff, President and CEO of GZA GeoEnvironmental, Inc. "Air quality is an important and growing sector of our industry and Tony is recognized as one of the top experts in this field. We will look to his leadership and expertise as we grow our business in this area."
