

GZA GeoEnvironmental, Inc. Team Experts to Present Live Teleconference on Brownfield Redevelopment and LEED®

NORWOOD MA...ISSUED APRIL 29, 2009...GZA GeoEnvironmental Inc., a leading environmental and geotechnical consulting firm, has announced that a team of experts will present a live teleconference teaching issues and ideas you need to know on “Brownfield Redevelopment and LEED® in 2009 – What Happens When You Mix Green and Brown?” on Tuesday, May 19th from 1 to 2:30 PM.

Wayne W. Cobleigh, CPSM, Lawrence Feldman, Ph.D, L.S.P., Thomas C. Klotz and David M. Winslow, Ph.D., P.C. of GZA will serve as faculty members and lead the teleconference. The teleconference offers continuing education credit and is geared towards engineers, developers, architects, presidents, vice presidents, real estate professionals, property managers, building owners and managers, environmental professionals and attorneys. Registration is available online through www.lorman.com or by calling 1-866-352-9539.

The teleconference is designed to provide understanding of the contributing factors to ROI of the maturing green building practices on Brownfields. Many professionals in the real estate investment business have witnessed how the redevelopment of Brownfields has increased over time due to the market realizing the ability to make a return on investment of contaminated properties. A survey by the Northeast-Midwest Institute indicated a trend that large-scale, community transforming Brownfield redevelopment in the U.S. is going green. Mixing green and brown when applied to investment in major urban mixed-use redevelopment projects is a win-win strategy for energy conservation and reduction of greenhouse gases.

“We are pleased that our LEED® and Brownfield Redevelopment experts are taking the On the task of education on these important and timely topics,” said William R. Beloff, President and CEO of GZA GeoEnvironmental, Inc. “This educational program is designed to assist potential LEED® applicants on Brownfields redevelopment projects to understand how LEED® pilot program for neighborhood development is being finalized as a standard in 2009.”
