

**Robyn Saunders of GZA GeoEnvironmental, Inc.
Receives Environmental Merit Award
as Part of the Long Creek Restoration Project Team**

PORTLAND, ME AND NORWOOD MA...ISSUED JUNE 2, 2009... Robyn Saunders, Project Manager for GZA GeoEnvironmental has received an Environmental Merit Award from the New England Office of the U.S. Environmental Protection Agency (EPA) as part of the Long Creek Restoration Project Team that was recognized for exceptional work and commitment to the environment

EPA's Environmental Merit Award is an annual award that recognizes outstanding environmental advocates who have made significant contributions toward preserving and protecting our natural resources.

The Long Creek Restoration Project is a collaborative, community-based initiative convened by the City of South Portland and made up of representatives from the four Long Creek watershed municipalities of South Portland, Portland, Westbrook and Scarborough as well as area businesses, non-profit organizations, and state agencies. The City of South Portland obtained a grant from EPA and Maine Department of Environmental Protection to partner with the other watershed municipalities and individual stakeholders in this effort.

The merit awards were presented at a special ceremony held at Faneuil Hall in Boston on April 22, 2009 as a celebration of environmental achievement in New England.

Saunders has been a member of GZA GeoEnvironmental's Portland professional practice group for 11 years. Her areas of specialization include regulatory compliance and storm water management. Saunders is a graduate of the Department of Civil and Environmental Engineering at the University of Maine in Orono.

"We congratulate Robyn on this prestigious award from the Environmental Protection Agency," said William R. Beloff, President and CEO of GZA GeoEnvironmental, Inc. "Robyn's outstanding contributions to this successful community project are a wonderful reflection of our mission at GZA. Robyn exceeded expectations and committed many hours of her own time in ensuring the successful completion of this project."
