# PROJECT QUICKSTART

GZA'S SHORTCUT TO KICKOFF

## WHAT IS GZA'S PROJECT QUICKSTART?

COVID-19 has shortened the 2020 construction season by slowing the planning process and delaying pre-bid meetings. Beyond that, where it makes sense, the current shelter-in-place requirement for non-essential businesses provides a unique, though hopefully narrow, window of opportunity to accomplish required construction projects unimpeded by ongoing operations. GZA's Project QuickStart provides an expedited pathway to project kickoff, accelerating the planning, permit application, engineering, and bidding phases to commence quicker than the conventional pre-construction approach.

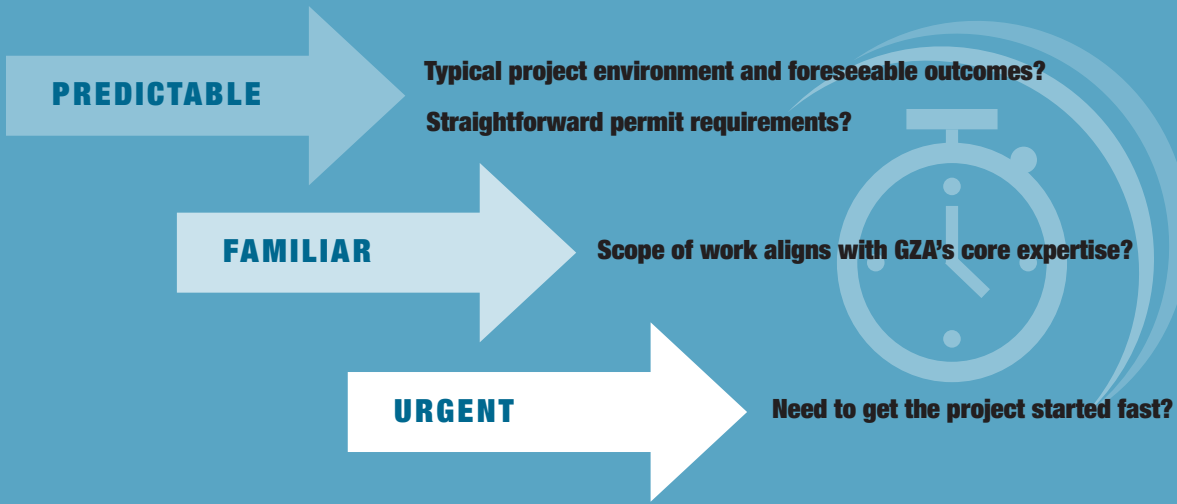

## WHAT TYPES OF PROJECTS DOES GZA OFFER THIS SERVICE FOR?

When applicable, based on project permit requirements and client procurement constraints, GZA professionals apply their deep understanding of typical projects based on the information you have available now and use flexible implementation options to quickly adjust project parameters when more information is available. Kickoff on schedule!

### IS MY PROJECT A FIT FOR QUICKSTART?

QuickStart is likely a great option for your project if it satisfies this framework.

### PROJECT TYPES CAN INCLUDE:

- Cleaning and Abatement
- Demolition
- Equipment and Tank Removal
- Soil and Groundwater Remediation

Where applicable, as stimulus funding becomes available, Project QuickStart may also be a great option to get your project quickly to “shovel-ready” status.

GZA is a professional engineering, consulting, and construction management firm that has been incorporated since 1964. We provide offerings within five major markets of services: **Construction Management, Environment, Geotechnical, Ecology, and Water.** With approximately 700 professionals and over 30 office locations we support client needs regardless of project locations throughout North America.

**Unsure if Project QuickStart is right for your needs?
